

i30 N

The feeling of N

If ever there was something you've never felt before, this is it.

The i30 N is Hyundai's first true high-performance car developed to debut the N division and redefine the way the world feels about Hyundai. With the award-winning third generation i30 as its basis, the i30 N was built by our best engineers to deliver uncompromised driving exhilaration, both on the road and the track, without foregoing the comfort and practicality needed for daily enjoyment.

Born to feel

Born in Namyang, Korea and put through the ultimate test at the Nürburgring, the world's most challenging racetrack, the i30 N has proven to be the car that truly awakens new feelings.

After nearly 500 laps at this unforgiving circuit, and around 10,000 kilometres of testing overall, we introduced a performance model worthy of the N badge.

Unparalleled Performance

The entire chassis of the new i30 N, from suspension, steering, brakes and tyres, has been completely overhauled to delight and thrill driving enthusiasts. A lower, firmer suspension tune combined with the adjustability of electronically controlled dampers means the new i30 N delivers exceptional turn-in characteristics and body control, without sacrificing daily driving comfort.

The Corner Lover

The electronically controlled mechanical limited slip differential (e-LSD) technology reduces wheelspin and understeer, while increasing traction and cornering speed, allowing the driver to enjoy maximum performance.

N steering wheel

Sublime Steering

The perfect combination of new hardware and precision improvements, including drive mode and paddle shift control, ensures meticulous steering and brilliant and dynamic performance.

Sun roof

Selectable damping modes: Normal, Sport and Sport+

Electronically controlled suspension

To deliver optimum handling on any road surface, the new i30 N comes standard with Electronically Controlled Suspension (ECS) featuring three selectable damping modes: Normal, Sport and Sport+.

Form follows function

From the black front headlamps and assertive front bumper (with its larger air intakes), to the rear stiffness bar and the red brake callipers with the striking N logo behind the unique 19-inch aluminium wheels, the new i30 N features an exterior designed to cheat wind and win hearts.

The interior of the new i30 N is made to awaken all the senses. It starts with sporty front seats, designed to provide exceptional support and comfort and the bespoke N steering wheel with dedicated N-mode button, as well as an N-specific race computer which features a lap timer, G-force meter, boost gauge and launch control.

Wireless smartphone charging

Apple CarPlay™ and Android™ Auto

Stay connected

The new i30 N is packed with the comfort and convenience features that make every ride the ride of your life. Stay connected at any speed with wireless smartphone charging and an 10.25-inch multimedia touchscreen with DAB+ radio, Bluetooth® connectivity and Apple CarPlay™ and Android™ Auto compatibility.

The humanity of technology

When technology lets a car perform like the new i30 N, we need it to think like a human when it comes to safety. Among numerous Hyundai Smartsense™ technologies, the new i30 N comes with seven airbags as standard, rear view camera and Front and Rear Park Assist System.

Rear view camera

Safety first

Although performance is the name of the game, the safety features of the new i30 N gives you peace of mind on the road. Complete with rear Blind Spot Collision Alert, Lane Keeping Assist, Forward Collision Avoidance alert and lane Following Assist, it's as safe as can be.
